

Vision of the 53206 REACH Initiative, Inc.

Fundamentally, poverty is the inability of getting choices and opportunities, a violation of human dignity. It means lack of basic capacity to participate effectively in society. It means not having enough to feed and clothe a family, not having a quality school or access to clinical resources; not having a job to earn one's living, not having access to credit. It means insecurity, powerlessness and exclusion of individuals, households and communities. It means susceptibility to violence, and it often implies living in marginal or fragile neighborhoods, with suspect water or minimal cleanliness.

The 53206 REACH Initiative desires to liberate souls and generate new lives with an ascending purpose. We believe this will be realized through empowering a disenfranchised community with redemption and hope beyond the degenerate conditions of this world's human experience.

Restoration of the neighborhood identity and recovery of a cooperative community spirit

We are endeavoring to make our surrounding area a sustainable place to live. It is our hope to enable people to feel empowered and take responsibility based on a shared vision, equal opportunity, and in a small sense helping people to possess the capacity to influence the outcome of decisions which affect them.

Help us:

- Continue to nurture potential servant leaders in the local community
- Support community efforts to find local solutions to local problems.

Education of the human mind and soul

Educational processes play an important role in developing human beings. Resources that provide encouragement for individuals to enhance their educational level are a necessary commodity for the economic underprivileged.

Help us:

- Bring literacy programming to the community
- Build skills and readiness of those who are willing to work

Awareness of human health essentials and promotion of strong family ideals

Impoverished families have acute challenges at outset. Many infants are born with less prenatal care; or perhaps no prenatal care, than what mothers of other infants receive. They have lower birth weights, in which many suffer from hunger, poor nutrition, and even from lead poisoning as they get older. Basic emotional needs are unmet.

Help us:

- Continue to facilitate awareness, aid, and access to human health essentials; such as food, clothing, hygiene, and clinical resources.
- Continue to provide interactive home and family strengthening sessions.

Character development and mentorship for youth in successful life principles

Economically disadvantaged families are more frequently victim to constant residence relocation; which means the children must change schools frequently. Parents, who often are single and have more than one job, visit their children's schools less frequently than do other parents and are less involved in homework and school projects.

Help us:

- Continue to instill in youth a moral foundation of virtue, honor, and excellence
- Bridge parental involvement gaps through youth mentorship platforms

Hope infused opportunities for economic progress and life empowerment

Personal dreams and a hunger to aspire and achieve is formulated by visualizing that which has never been introduced to us before. Intellectual stimulation must occur for youth to develop cognitively and creatively. There is a promise to all individuals which offers all the prospect to elevate above the negative circumstances of this life.

Help us:

- Expose youth to career options and life experiences beyond their immediate surroundings
- Provide incentivized achievement programs in; character building, personal life vision, and academic opportunities for the under educated
